

EXPERIMENTAL DATA:

ph drop			
trials	no treatment	naf	mfp
1	7.18	7.18	7.18
2	6.74	6.97	7.04
3	6.51	6.94	6.88
4	6.12	6.91	6.74
5	5.87	6.83	6.62
6	5.86	6.76	6.58
7	5.69	6.86	6.56

GRAPH:

NOTES:

DURING

the no treatment began to drop very quickly, it seemed that the bacteria were metabolizing well

questions: what exactly was in the buffer that malek made?

AFTER

good data, upon leaving, we still wanted to find a way to see mfp beat naf

what did malek do to make mfp superior?
